HILLCO AIR FLOW SYSTEMS
FOR CASE-IH FLAGSHIP COMBINES

Hillco Air Flow Systems will extend the life of your combine's air filter in dusty and dirty conditions. The self-cleaning design requires no maintenance and will reduce the amount of dirt entering your combine's air filter. Contact Hillco or your local Case-IH dealer for more information.

Benefits of a Hillco Air Flow System

- Extended Air Filter Life
- Reduced Downtime
- Increased Engine Life
- Increased Fuel Efficiency
- Simple and Quick Installation
- Maintenance Free
- Water Tight Design

The engine draws air causing the impeller in the precleaner to spin. The centrifugal force of the spinning impeller expels the heavy "dirty" particles out of the discharge louver. The clean air then enters the intake.

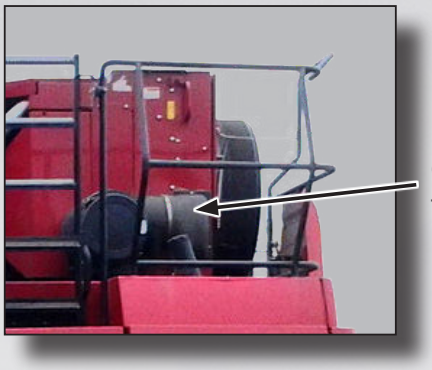
LOW MOUNT

HIGH MOUNT

Case-IH Flagship Combines		Hillco Kit Part Numbers
Flagship Combine	7010, **7120, 8010, & **8120	**CLM7010**
Flagship w/Corn Screen*	7010, **7120, 8010, & **8120	**CLM7510**
Flagship High Air Intake	9120, 7230, 8230, 9230, 7240, 8240, 7250 & 8250	**CHM9010**
Flagship High Air Intake w/ Corn Screen*	9120, 7230, 8230, 9230, 7240, 8240, 7250 & 8250	**CHM9510**

*Corn screen is necessary when harvesting crops with large dry leaves such as corn or sorghum.
**Some 7120 and 8120 combines were updated by Case-IH to draw air out of the top of the radiator. Please look at the below pictures to identify which intake your combine has.

HOW TO DETERMINE IF YOU NEED A LOW OR HIGH MOUNT KIT



Kits CLM7010 and CLM7510 fit combines that draw air from the bottom of the radiator.

Kits CLM9010 and CLM9510 fit combines that draw air from the top of the radiator.

Hillco recommends the use of the corn screen if the combine will be harvesting corn or other crops with large dry leaves. The screen prevents leaves from being sucked into the precleaner.
