GENERAL INFORMATION

SERIAL NUMBER LOCATION

TEXT AND ILLUSTRATIONS

The arrangement of this parts catalog is for easy identification of parts. All parts are illustrated in exploded views in proper relation to each other. Some diagrams refer to other pages for further information. Reference numbers used in the illustrations refer to line numbers in the part lists. The part lists appear to the right or below all diagrams and correspond with those diagrams. Included in the part lists, along with the reference numbers are part numbers, part descriptions and the quantity of the part required per leveling system.

ABBREVIATIONS

SN "Serial Number" refers to the serial number given to each leveling system (by Hillco Technologies), as well as the serial number given to the combine (by the specific combine manufacturer) the leveling system is installed. See above for the leveling system's serial number location. This abbreviation is used interchangeably in both instances. Each Model JS9110 Leveling System uses the following serial number format: JS9110-XXXXX (sequential numbers).

ASM "Assembly" refers to a whole grouping of parts (shown in the diagram corresponding with the page where "ASM" is shown unless otherwise noted). Some assemblies have parts that are sold separately, however some must be purchased as a single unit. Hillco Product Specialists will be able to assist you with any questions.

NS "Not Shown" refers to a part that is not depicted in the illustration.

RIGHT AND LEFT IDENTIFICATION

The reference to right-hand and left-hand in this catalog is identified by the operator sitting in the operator's seat, looking toward the front of the machine (in normal forward travel).

PART ORDERS

Orders must specify product model, serial number, correct part number, complete description, quantity required, method of shipment, shipping address, and billing address.

This diagram illustrates the assembly of a hydraulic system. The main components are a green mounting plate (3), a grey hydraulic cylinder (11), and a grey hydraulic valve block (8). The valve block is mounted on the plate and features several ports. A red box highlights the valve block and its immediate connections. A red line indicates a specific connection point on the valve block. The system includes various fittings (1, 2, 4, 5, 6, 7, 9, 10, 12, 13, 14, 15, 16, 17, 18) and a flexible hose (10). The components are numbered 1 through 18 for identification.
