

The engine draws air causing the impeller in the precleaner to spin. The centrifugal force of the spinning impeller expels the heavy "dirty" particles out of the discharge louver. The clean air then enters the intake.

Benefits of a Hillco Air Flow System

- ▶ Extended Air Filter Life
- ▶ Reduced Downtime

*Corn screen is necessary when harvesting crops with large dry leaves such as corn or sorghum.
**Some 7120 and 8120 combines were updated by Case IH to draw air out of the top of the radiator. Please look at the below pictures to identify which intake your combine has.

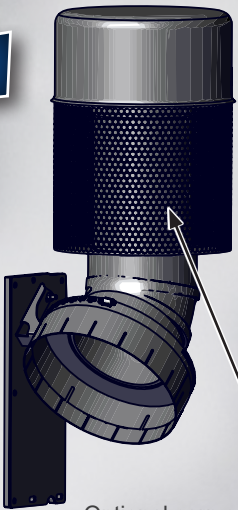

Kits CLM7010 and CLM7510 fit combines that draw air from the bottom of the radiator.

Kits CHM9010 and CHM9510 fit combines that draw air from the top of the radiator.
